Streamline your business processes
with Power Platform

Streamline your business processes

In every organization employees perform countless routine tasks and processes every day. These are frequently manual tasks that are time-consuming and are not always carried out in the most efficient manner. The Inetum-Realdolmen Power Lab offers a solution for this.
Opt for automated and digitalized processes so that your employees can focus on the essentials, and maximize their added value.

The challenge

The digital transformation is well underway, and involves plenty of challenges.

- Deeply entrenched paper processes, the changing expectations of employees, outdated business applications and a lack of time and budget are well-known factors that can contribute to a digitalization logjam.
- In addition, there is more and more pressure to be able to adapt rapidly to the ever-changing needs of the marketplace.

"To stay competitive, organizations need the ability to update applications and processes rapidly."

Our vision

- The customer occupies a central role. Never before a customer has been able to choose among so many different companies, so he's increasingly looking for a company that really offer an answer to his needs and questions.
- The way in which organizations work has evolved, with faster production and innovation cycles to achieve the desired business outcomes.
- This means that teams need tools that are a good fit with their daily tasks, and need them without development processes that take forever.
- The intelligent use of data derived from multiple sources is one of the key elements needed here to evolve towards a more efficient way of working.

Agile and innovative
toolset to boost delivery of new services

Connected experiences
accelerate the flow of information, improving productivity

AI-powered services
to find and analyze information, providing critical insights

"Adapt your workplace to the changing needs of your employees"

The Inetum-Realdolmen Power Lab

1 platform, endless options
With the help of Microsoft's Power Platform, the Inetum-Realdolmen Power Lab is able to provide your employees with more insights into data (Power BI), to manage intelligent business processes via apps (Power Apps, Power Virtual Agents) and to partially or completely automate processes (Power Automate).

Power Apps
Application development

Power Automate
Process automation

Power BI
Business analytics

Intelligent Virtual Agents

Our offering

Thanks to our team of Power Platform experts across a variety of domains, we can help you either to take your first few steps using the platform, or to develop an effective solution. We believe in rapid work and delivery. No days of study or long development time needed anymore! We offer low-threshold Starter Packs where we build a working base solution within a few days.

Do you prefer to work out your own solutions? Get inspired during our Aware & Discover Workshop, where our experts will introduce you to the Power Platform and the best-practice approaches, allowing you to develop your specific scenarios based on a number of client cases. In addition, our Governance & Lifecycle sessions provide you the insights you need about security, government and component management.

Getting started
Aware & Discover

- Goal: Inspire and assist in unlocking the Power Platform potential

- Duration: 1 day

- Result: Guidance & assistance, potential Power Platform cases

Building your app(s)
Starter Packs

- Goal: Build, test & deploy an app based on the Power Platform

- Duration: 3,5 or 10 days

- Result: An operational Power Platform solution

Staying in control
Governance & Lifecycle

- Goal: Set up a maintainable Power Platform environment

- Duration: depending on context

- Result: Controls to manage creation, operation and deployment of Power Platform solutions

Do you want to experience the power of the Power Platform live for yourself?

We would be happy to come and see you and demonstrate a few scenarios. Contact us at info@Inetum-Realdolmen.world and we will get back to you as soon as possible. You can, of course, also contact your Customer Executive.
